

1979a

“Magnetometer Bias Determination and Attitude Determination for Near-Earth Spacecraft,” G. M. Lerner and M. D. Shuster, Paper No. AIAA 79-1695, *Proceedings, AIAA Guidance and Control Conference*, Boulder, Colorado, August 6–8, 1979, pp. 1–10.

The conference article contains some material which was deleted in the later journal article, 1981d. That material shows the effect of analog-to-digital conversion on the data, but is not important to an understanding of the algorithm.

The work is described more fully in the comment to 1981d.

Superseded by 1981d.
