

1990e

“QUEST, a longa história de um algoritmo rápido” (invited plenary paper), M. D. Shuster, *First Brazilian Symposium on Aerospace Technology*, São José dos Campos (SP), Brazil, August 1990, 36 pp.

This was an invited plenary talk which I presented in (bad) Portuguese. (The language of the conference article was improved greatly through the efforts of INPE engineers Hélio Koiti Kuga and Roberto V. F. Lopes.) A proceedings volume was never produced for this symposium.

Superseded by the English language 2001c.
