“The Kinematic Equation for the Rotation Vector” (Engineering Note), M. D. Shuster, *IEEE Transactions on Aerospace and Electronic Systems*, Vol. 29, No. 1, January 1993, pp. 263–267.

The publication in the IEEE-AES of a needlessly complex derivation of the kinematic equation for the rotation vector led me to publish two much simpler derivations and to show that all derivations of this kinematic equation, except for the needlessly complex one, are basically the same.
