“Erratum: Kalman Filtering of Spacecraft Attitude and the QUEST Model” (Technical Note), M. D. Shuster, *The Journal of the Astronautical Sciences*, Vol. 51, No. 3, July–September 2003, p. 359.

While a graduate student in the People’s Republic of China, Dr. Yang Cheng pointed out an error in 1990d. The correct result is published here with proper credit given to Dr. Cheng. This error, fortunately, does not affect the execution of the algorithm.

Dr. Cheng has since come to the United States, and we have collaborated on several publications. In particular, he has discovered a simple transformation which improves the robustness of the QUEST algorithm.

Succeeded 1990d.
