

2008a

“The TASTE Test,” M. D. Shuster, *The F. Landis Markley Astronautics Symposium*, Cambridge, Maryland, June 29–July 2, 2008; Proceedings: *Advances in the Astronautical Sciences* (in preparation).

This conference article consists of the first portion of a conference paper presented in 2005 (2005f) with additional results on the role of star-identification. The author thought it to be a perfect article to appear in the eventual special issue of *The Journal of the Astronautical Sciences* based on the symposium.
